Safe and dependable

Pet Transport Worldwide Import and Export

How to Measure Your Dog

A = length of the pet from tip of nose to root of tail.

B = height from ground to top of leg or elbow joint

C = width across right & left shoulders

D = height of the pet in natural standing position from ground to the top of the head or the tip of the ear in erect ear breeds.

Minimum Container Dimensions are:

Length = A+B

Width = C + 1in (3cms) X 2

Height = D + 3 ins (7cms)

Imports:

As part of our global import services for pets, we can arrange Veterinarian examination using a mobile clinic at Dublin airport which speeds up the process of completing all the documentation and release of your pet.

Examination is compulsory for all animals originating from countries outside of Europe. We can also provide short to medium term kennel facilities located close to Dublin airport and grooming service if you wish to have your pet fresh and ready when you are ready to go home.

Export:

We can supply airline approved travel kennels suitable to the size and weight of your pet. Assistance is available regarding the correct documentation and procedures to complete prior to departure. A member of the Pet team will meet you and your pet at Dublin airport on the day of departure to complete the process.
